1 System Description

This is a *Freelancing Management System*, a system which allows *Customers* and *Freelancers* to find one-another easily. It manages the processes from finding workers, verifying them, engaging, paying up to rating. Let us take you on an interesting tour into the *system actors*, every one of them sees the system differently according to their role.

1.1 Root

The Root is the owner of the system. He is the one who set it up for the first time with a special root access from him.

1.2 Admin

1.3 Freelancer

1.4 Employer

2 Diagrams

These diagrams abstract FMS due to several points of views

2.1 Domain Diagram

2.2 Class Diagram

2.3 Use Case Diagram

2.4 Class Diagram
